Description:

Are you looking for a unique way to spend your summer ... an experience that will allow you to learn and earn at the same time? After months of lectures, homework, and exams, you'd probably like to escape to an exciting location for a much-needed break. But why not get a jump start on your career by spending your summer as an ESRI intern? Pay is just one of the benefits of being an ESRI intern. An internship with us is an opportunity to be associated with the world's leading developer of GIS software and work alongside top-notch staff. You'll gain personal and professional skills that will give you an edge in the workplace after graduation.

ESRI benefits from being able to spot potential talent, train and bring up to speed, and potentially hire a future employee.

Qualifications:

Working knowledge of CAD software and newer BIM packages like Revit as well as other 3D and visualization packages like Sketch-up, 3D Studio, etc. Schooling in engineering, civil or architectural preferred with interest/skills in programming. The most successful intern will have a strong desire to produce quality work and achieve great results. We seek students who excel at working on individual projects as well as collaborating in a team environment. We're looking for the best and the brightest.

All applicants must be currently enrolled students living in the Boston, MA area or have the ability to relocate for the summer.

Internship Description:

The goal for this position is to work with customer data to develop (edit, convert, analyze, visualize, serve) sample “virtual city” data sets and the workflows to exchanged data from common packages with ArcGIS for 3D & 4D building, city, and campus data. The individual would be testing our latest development releases of 9.4 as part of the work. The learning objectives for the intern would be a strong working knowledge of ESRI’s 3D data types, temporal capabilities, tools (3D Analyst, Data Interoperability) and workflows, and how to integrate/interoperate with other industry tools.

More information on the ESRI Summer Internship Program in general can be found at www.esri.com/grads.

To apply, submit a resume and cover letter to Michael Johnson, ESRI Internship Program Manager, at interns@esri.com.
