Software Engineer Intern - Web Applications & UI

Title: Software Engineer Intern (10 weeks - Summer 2009)
Location: Cambridge, MA
Resume deadline: March 8, 2009. Email resumes to Rachel McClain jobs@nextjump.com
Compensation: Competitive including housing subsidy.

Company Summary:
Next Jump is the premier provider of internet-based Rewards & Loyalty programs to corporations, affinity groups and institutions worldwide. Our patent-pending technology captures user preferences in order to negotiate with merchants for discounts and rewards. The scale of Next Jump’s customer network, the accuracy of our consumer preference data, and the proprietary technology we use result in the highest value for end consumers. Our clients include Bank of America, Sony, Goldman Sachs, Accenture and General Electric. Our active permission-based customer database generates over $10 billion in annual sales for over 25,000 merchant partners. The Cambridge office is situated in Kendall Square. The office boasts a state-of-the-art fitness center which includes a batting cage and rock climbing wall. In addition to the core application development team, the office houses a 24/7 network operations center.

Internship Description:
• 10 week summer program
• Both UI and web application engineer interns
  o UI interns will contribute to the design, development, and implementation of mission-critical customer-facing applications.
  o Web application engineers will work closely with product managers and UI engineers to plan, develop, test and deploy internal and external applications.
• Interns participate in a summer-long group competition which culminates in a presentation at an all company meeting juried by the CEO and chief engineers.

Requirements:
• JavaScript, HTML
• Experience creating web services
• Excellent organizational and communication skills
• High-degree of creativity and strong analytical mindset
• Pursuing Bachelors Degree in computer science, engineering or equivalent technical field

Preferred:
• Experience with Java frameworks, PHP, CSS, Eclipse, MS SQL Server
