Project Description:
The Child Cognition Lab conducts research projects with children and adults. We are currently adapting our adult studies to be completed online in order to reach a broader sample of participants. We are looking for a highly creative, self-motivated and technically savvy individual to develop and launch at least one of our studies, which measures participants’ reaction time when making decisions about images.

Qualifications:
• Experience with the installation and configuration of LAMP stacks or similar web servers
• Proficient in PHP, Java, Javascript, and other dynamic web technologies
• Proficient in Application Development processes and procedures
• HTML5 a plus
• Interest in psychology research preferred

We are looking for the ideal candidate to begin as soon as possible. Please send your resume and samples of previous work to rseston@bu.edu.

Please contact the lab manager, Becca Seston, at (617) 358-1738 or rseston@bu.edu if you have any questions.
