The Colorado Biomedical Informatics Summer Training Fellowship Program will introduce first-year computer science graduate students from diverse, disadvantaged and traditionally underrepresented groups to PhD level research career opportunities in Biomedical Informatics.

Students will participate in a 10-week summer research program that includes:

- Biology for computer scientists (1 credit)
- Ethics for Biomedical Informatics (1 credit)
- Scientific communication workshop
- Research rotation (1 credit) culminating in a presentation of research findings

**Eligibility:** Research students will be selected on the basis of academic achievement and interest in biomedical informatics. Applicants must have completed at least one semester of graduate school with a 3.0 GPA and must be a US citizen or permanent resident.

**Application Includes:**

1. Online application form http://combio.ucdenver.edu/summer
2. Two letters of recommendation
3. Personal statement of interest in a biomedical informatics career
4. A current transcript

**Stipend:** Student will receive a $5,500 stipend for living expenses. Tuition and fees are paid by the program.
