Spring 2014 Internship - Boston University School of Medicine mHealth study – seeking students with web or mobile development experience

Grant funded research study to develop a smartphone based platform for delivering a behavioral hypertension reduction intervention. The project is led by BU School of Medicine faculty with development partners in the BU Computer Science Department. We are looking for BU students with mobile and/or web development experience to join a group of students and faculty working on the project. Experience is important but a high level of motivation, independence and an ability to learn quickly are even more critical. This study has future commercialization opportunities and has a “start-up” type atmosphere.

REQUIREMENTS:
- BU student (undergraduate or graduate)
- Deep understanding of and experience developing in one of the following languages: Java, Objective-C, Ruby.
- Interest or experience working with one of the following: HTML/CSS, JavaScript, jQuery, iOS or Android.
- Ability to communicate effectively with non-technical team members.

If you are interested please email mikeweng@bu.edu with a resume and either a portfolio of past projects or links to apps and websites that you have worked on. We look forward to hearing from you soon!
