Who is MASS Design Group?
MASS Design Group is a social enterprise design firm based in Boston, MA and Kigali, Rwanda. MASS’s work seeks to leverage design to improve lives through a variety of mediums, from architecture and construction to policy and research. Across every project, MASS strives to employ local labor and materials, work with local experts in material innovation and development, and ensure every space we create empowers its user. MASS is actively working in multiple countries across Africa and North America.

We are always looking for great people that will help us change the purpose, change the practice, and change expectations of building to create a better world. MASS is a young, hardworking team from the fields of architecture, design, public health, and global development. Our diverse staff collectively enables a dynamic work environment, and we’re always learning from each other. We want to bring the best designers, public health experts, and international development gurus to some of the world’s most pressing challenges.

What is the Internship?
You will have the opportunity to join the MASS Boston office working closely with our operations team. We are looking for bright and creative individuals who enjoy working in a fast paced environment. Operations interns will work on a variety of engaging tasks that support our colleagues in Boston and around the globe. This internship is best for individuals interested in working for a social enterprise, or have backgrounds or interested in international development, computer science / web development, design, or finance.
