We are recruiting for instructor and camp director positions for 5 programs

**iD Tech Camps:** Spend your summer instructing and mentoring students ages 7-17, sharing your love for technology, and having fun. You'll make a positive impact on students this summer, and inspire them to aim big for college and beyond. We offer weeklong day & overnight summer camps for aspiring programmers, app developers, video game designers, robotics engineers, 3D modelers & animators, filmmakers, photographers, and more

**iD Gaming Academy:** Prove that gaming is more than a hobby and help our students gain a competitive edge for college and future careers. Immerse them in the creative world of game production, help them build a portfolio, interact with industry professionals on a studio tour, and even play in gaming tournaments. Our intensive, pre-college teen programs prepare students ages 13-18 for futures in game design & development.

**iD Programming Academy:** Help our students discover a potential career in programming and gain a competitive edge for college and future careers. Immerse them in the open-ended world of computer science, increase their understanding of application development, help them build a portfolio, and interact with industry professionals while touring a major app development studio. Our intensive, pre-college teen programs prepare students ages 13-18 for futures in computer science and engineering fields.

**Alexa Café:** Alexa Cafe isn't just a summer camp for girls. It’s a movement. Help inspire our students to discover a potential career as the next great tech innovator or create a brand that kick starts a social movement. Maybe it’s a fitness app that lets you raise money for charity while you jog, or a website that helps the Humane Society connect pets with adopters. Perhaps it’s a game where a high-score becomes a donated meal. Alexa Cafe is where innovation meets inspiration. We offer weeklong, day and overnight courses for girls ages 10-15.

**iD Mini:** Spend your summer instructing and mentoring students ages 6-9 about the fundamentals of technology. You'll make a positive impact on students this summer, and inspire them to aim big for college and beyond. iD Tech Mini is a new co-ed program for kids ages 6-9, offering fun courses in programming, video game design, and robotics.
