Incredible Systems/Network Administrator

You will maintain Rapleaf’s entire infrastructure and enhance the system to do great things, as we’re on the trajectory to change the world.

Role:
- Manage all Rapleaf servers (Linux - CentOS, Redhat), backups, web servers (Apache clusters)
- Manage relationship with hosting provider and hardware vendors
- Systems administration (DNS,LDAP,NFS,TCP/IP,SELinux)
- Scalability and expansion (Hadoop)
- Some scripting (Shell, Ruby, Python, or Perl)
- Administer MySQL databases (multi-master replication, snapshot backups)
- Learn how to scale with Ruby on Rails
- Manage billions of data items/pages being served
- On-call duty

Note: this job is really hard. You’ll be working with some of the top search engineers in the world and they are going to expect that you kick ass. We’re doing things that no one has ever done before and solving problems that have been open for years.

Qualifications:
- Master of all things Internet and Linux.
- Incredibly smart, can learn fast, and takes no prisoners
- Learn new platforms fast. We use Ruby on Rails - you can pick this up quickly.
- Intensely driven and proactive person.
- Extremely hard working. This is a start-up - team members work long hours.
- Quick learner and real doer. Err on execution over strategy.
- Thrive on working with A-players. Too good to spend long hours with B-players.
- Likeable person who garners respect on and off the job.
- Thrive on chaos, risk, and uncertainty.
- Should be easy to get along with, nice, fun, smart, ethical, and low-maintenance.
- Strong desire to build a more ethical society.
- Desire to be an early employee and want to be a real owner in Rapleaf’s future.
- Want to work with extremely large datasets and indirectly build portable APIs that thousands of other companies can build applications on top of.
- Ability to lift and install servers (50 lbs)
- Should want to live in or near San Francisco (relocation available if necessary)

Location:
- Downtown San Francisco, CA (Mission and 3rd)

Perks:
- Good salary/stock compensation.
- Personal MacBook Pro or Linux based machine
- Medical insurance, 401k.
- Kitchen stocked with food
- Work with some of the smartest engineers
- Contribute to the Rapleaf Dev blog (http://blog.rapleaf.com/dev/)

At Rapleaf, we’re only looking for people that really want to change the world. If interested, please email jobs@rapleaf.com. If you know someone who may be interested, we also offer a $10,007 referral bonus.
