CREDIT SUISSE Job Description

IT Quantitative Summer Associate

Description

The Credit Suisse IT Quant Associate Program is an elite initiative to hire summer and full-time Masters of Financial Engineering and/or Post Doctorate students who can create engineering solutions to support our quantitative products and processes such as Derivatives and Risk Management. Students are hired directly into the technology organizations supporting the Investment Banking (IB) businesses. Summer Program is a 10-week program, running from June through August, in our New York office. During the course of the internship, interns will be evaluated and may be invited to join Credit Suisse full-time upon completion of their studies. In addition to the responsibilities within their respective divisions, the associates are aligned with a short training curriculum that focuses on the development of personal skills and business knowledge.

Training

Training for this program is designed to give participants a core set of skills and knowledge about the Financial Services industry and Credit Suisse. This program takes place at the same time as Credit Suisse’s traditional Summer Associate Programs so IT Quant interns will also participate in various networking events and educational activities organized by our Campus Recruiting Department and Credit Suisse Business School.

Qualifications

We seek candidates with a strong work ethic, high energy level, and strong interpersonal and communication skills. Successful program participants share many common traits. They are listed below.

- Analytical thinkers, with software development skills
- Quick learners, assimilating information quickly, organizing it, and putting it into useful form
- Quick to seek the help of peers, recognizing the value of support and mutual assistance
- Enthusiastic, eager to advance quickly and assume greater leadership responsibility
- Comfortable thinking outside the box and innovating beyond the limits of a position
- Ability to work in a fast paced environment

Credit Suisse Firm Overview

Credit Suisse is one of the world’s premier financial providers offering investment banking, private banking and asset management capabilities to corporations, high net-worth families, entrepreneurs, governments and institutions around the world. Our unique integrated business model enables us to develop comprehensive financial solutions that meet the increasingly complex, global needs of the sophisticated clients that are our focus at Credit Suisse. We benefit from having established relationships and extensive network across both developed and developing market and economies. The bank is active in more than 50 countries internationally, and employs approximately 45,000 people.
