Title: Software Engineer – Full time or Graduate student intern
Location: Boston/New York
Resume deadline: March 8, 2009. Email resumes to Rachel McClain jobs@nextjump.com
Compensation: Competitive.

Job Description:
We are looking for both user-interface engineers and web application engineers.

As a user-interface engineer, you will contribute to the design, development, and implementation of mission-critical, customer-facing applications to include PHP, HTML, CSS, JavaScript, and AJAX design. You will work both independently and in a team to deliver strategic application enhancements and create intuitive interfaces making complex tasks easy to execute. You will quickly prototype, implement and iterate on designs.

As a web application engineer, you will work closely with product managers and user interface engineers to plan, develop, test and deploy internal and external applications. You will use the latest J2EE frameworks (JSF, Seam, EJB) and SQL programming to build scalable applications to meet our ever increasing traffic. There will be a variety of projects and you will take them from start to finish and through follow-up.

Requirements:
• Experience developing in Java or C++
• Excellent organizational and communication skills
• High-degree of creativity and strong analytical mindset
• Able to work in an agile development environment
• Pursuing Bachelors Degree in computer science, engineering or similar technical field

Preferred:
• Internships with web development experience
• PHP, JSP, EJB, Ant, ASP.NET
• MS SQL Server, ORACLE, or related RDBMS
• HTML, DHTML, JavaScript, AJAX, DOM
• XML/XSLT
• Experience creating web services
• Linux/Unix environment proficiency
• UML knowledge
• Experience with Java frameworks, including Struts, Spring, and Hibernate
• Object-oriented design experience
• Knowledge of database design and SQL

Company Summary:
Next Jump is the premier provider of internet-based Rewards & Loyalty programs to corporations, affinity groups and institutions worldwide. Our patent-pending technology captures user preferences in order to negotiate with merchants for discounts and rewards. The scale of Next Jump’s customer network, the accuracy of our consumer preference data, and the proprietary technology we use result in the highest value for end consumers. Our clients include Bank of America, Sony, Goldman Sachs, Accenture and General Electric. Our active permission-based customer database generates over $10 billion in annual sales for over 25,000 merchant partners. The Cambridge office is situated in Kendall Square. The office boasts a state-of-the-art fitness center which includes a batting cage and rock climbing wall. In addition to the core application development team, the office houses a 24/7 network operations center.
