Position: Entry Level Software Developers with strong background in engineering and physical sciences.

Employer: CUBRC Inc., Buffalo, NY

Minimum Education: B.S., Computer Science, Science or Engineering

CUBRC is an independent scientific not-for-profit corporation based in Buffalo, NY. CUBRC executes Research, Development, Testing and Systems Integration programs in Information Fusion, Medical Biotechnology, Chemical and Biological Defense, Public Health and Safety, Hypersonics, and International Security. Please visit www.cubrc.org for more information regarding these research areas.

A number of positions are available including Research Scientists in the area of Applied Information Sciences. These positions are focused on research, development and testing activities in the areas of modeling and simulation, biometrics, information fusion, traffic safety, and command, control and communications applications. Programming skills are strongly required, including C, C++, JAVA, .NET, XML, and other enterprise computing standards. An emphasis will be placed on candidates with strong engineering, mathematical, statistical, and physical sciences education and experience. Proficiency in Microsoft Office, Windows, and Linux a plus.

The candidate must be eligible for work on a variety of U.S. Government programs typically requiring U.S. Citizenship.

The students can access this website, www.ubjobs.buffalo.edu, to get further details on the position we have available. All applicants must complete the application and submit this information through the UB website in order to be considered for employment. They can log on and choose "search postings"; key in posting # 0800027 for our Software Engineer position.
