Junior Software Engineer

Ziftr is a consumer shopping engine, which leverages big data to track global product trends and find the best prices while you shop. Our goal is to simplify the online shopping experience by helping users find exactly what they’re looking for and automatically comparing prices at different stores.

Ziftr is looking for an eager programmer to join our close-knit group of developers and to help us take online shopping to the next level. This is a flexible, full-time position that will allow you to learn from the best and take your experience to the next level.

In this role, you can expect to:

● Find and implement creative solutions to business critical problems
● Learn from an experienced team
● Documentation and unit tests
● Document, analyze, and find solutions for bugs
● Suggest improvements to processes and execute on those improvements
● Play countless games of foosball (unless you’re working remotely -- we’re still working on the telepresence foosball robot)

You should definitely have these skills:

● General knowledge of computer science principles
● A degree in Computer Science, a related field, or relevant work experience
● Some experience with PHP, C/C++, Java, Ruby, and/or Python
● Some SQL experience
● Strong written and verbal communication

..and it would be even better if you had these too:

● Javascript experience
● HTML experience
● Previous experience working with RESTful APIs (consuming or developing)
● CakePHP, Ruby on Rails, or some other MVC framework
● Regular Expressions
- CSS experience
- XML experience

**Be prepared to show off any of your:**
- Class projects
- Personal homepage
- Stack Overflow account (if any)
- Open source contributions (if any)
- Any other side projects

Not too sure about your proficiency in one or two of the above skills? As long as you have the basic know-how, a team-player attitude, and a willingness to learn, we’re willing to teach you all you need to know.

**Location:**

Milford, NH with the ability to work remotely

**Contact:**

Qualified candidates should send their resume and cover letter to:
